

Page Name: D|13 Sink System features XLERATORsync® Hand Dryers: Where Form Meets Function

Page Title: D|13 Sink System with XLERATORsync® Hand Dryers Creates One-Stop-Shop Sink

Meta Description: Find out how the D|13 Sink System with XLERATORsync® Hand Dryers elegantly provide a hygienic, touchless hand-washing and hand-drying experience.

Body:

Excel Dryer is excited to announce an exciting collaboration with D|13 Group. The D|13 Sink System featuring the new XLERATORsync™ Hand Dryer is where form meets function. It's a "one stop shop" for both designers and users featuring a faucet, soap dispenser and hand dryer all within arm's reach of the basin, making this hands-free integrated sink system both hygienic and easy to use.

It's no secret that dryers are more sustainable, less wasteful and easier to maintain than paper towels or other drying methods. The D|13 Sink System featuring the XLERATORsync™ Hand Dryer also improves restroom cleanliness by replacing dirty, wasteful paper towels, making maintaining a clean restroom is simple and easy. With the D|13 Sink System, designers can create a cleaner, simpler environment, with fewer pieces of hardware and less litter.

The state-of-the-art XLERATORsync™ Hand Dryer was designed by Excel Dryer in collaboration with world-renowned design firm Gensler. Utilizing Excel Dryer's patented XLERATOR® technology, the XLERATORsync™ Hand Dryer is both elegant and sleek, and its "reverse airflow" design blows air and water flow away from the user, promoting hygiene and preventing a mess.

The XLERATORsync™ Hand Dryer in the D|13 Sink System provides an elevated user experience, with a fast 14-second dry time, adjustable speed and sound control and adjustable heat control. This fixture provides a 95 percent cost savings compared to purchasing paper towels and uses 80 percent less energy than conventional hand dryers. The XLERATORsync™ features a HEPA filter proven to eliminate 99.97 percent of viruses in the air. This no-touch, high-efficiency fixture, making it the most hygienic, sustainable and cost-effective way to dry hands.

The XLERATORsync™ Hand Dryer also features a patent-pending sound suppression air delivery system, a washable pre-filter, an externally visible LED service light and Excel Dryer's industry-leading 7-year warranty.

The D|13 Sink System with XLERATORsync™ Hand Dryers are now part of an elevated experience in parts of Gillette Stadium. Kraft Sports and Entertainment recently renovated VIP areas such as the Optum Field Lounge, Cross Pavilion and Putnam Club Lounge, adding the D|13 Sink System with XLERATORsync™ Hand Dryers to those areas.

"Aesthetics are a big part of building these new spaces," Jason Stone, Senior Director of Operations at Kraft Sports and Entertainment says. "The D|13 Sink System blends seamlessly with the other finishes we installed throughout the space. It gives our customers the extra VIP

experience so when they walk up to the sink, they have the soap, water and hand dryer all in the same location.”

XLERATORSync™ Hand Dryer can be customized to match any design aesthetic. You can find additional details and specifications [here](#).
